

Regulations

As specialised breeders, Pawprint Puppies want to ensure the best quality pure bred King Charles Cavaliers for all families or individuals. These are our regulations as registered breeders with Dogs Victoria that we oblige by and follow which promotes fairness within our organisation and structure to all customers.

1. All customers placed on our notification list are direct submissions from our 'Get Notified' page. We only accept **one** submission per family or individual. As soon as we receive your request, you will be placed onto our notification list and **that is your placement**. Submitting more than one request, will not enhance your chances or affect your original placement. No exceptions will be granted.
2. Once our new litter arrives, all customers placed on our notification list are considered **priority** and will be the first people notified that our new litter is available. Our notification list customers will be advised **three** days prior to advertising on our website, that our puppies are available.
3. In the case all puppies are sold and you are still currently on our notification list, all names and details will be brought higher on the notification list for the next litter.
4. Furthermore, the Pawprint Puppies social media accounts including other advertising websites will not be notified that a new litter is available as all of our litters are strictly advertised on our website.
5. If you choose to purchase one of our puppies, submitting an adoption form including providing the puppy reference number, found on our 'Adopt a Puppy' page, is an official submission which means you are **purchasing** one of our puppies. If you are not serious about purchasing one of our pure bred, King Charles Cavaliers, the puppy of choice will become available to the public once again.
6. After an adoption form has been received, reviewed and accepted, Pawprint Puppies will be in contact with you via email and/or phone and will provide you with a copy of our Health Guarantee and Deposits. This document will also include the process and the amount of our deposits.
7. In regard to home visits, all new owners are able to visit their puppy after 6 weeks of age. This means your puppy has had it's first vaccination.
8. **All** of our pure bred King Charles Cavaliers will be ready for their new homes from 8 weeks of age.
